

Stakeholders' Conference

Ports and their Connections within the TEN-T

7th of July , Brussels
14.00 – 18.00

Albert Broschette Centre, Rue Froissart 36,
Brussels

Stakeholders' Conference

We would like to invite you to attend the Stakeholders' conference, organized with the support of the European Commission for the project "Ports and their Connections within the TEN-T". The current study focuses on the relationships between the development of the maritime sector, investment in ports and investment in the supporting networks. A key objective is to provide a clear view on how port related flows are dispersed over the TEN-T network. This will support decision making about the future of the TEN-T network by taking into account the role and impact of ports and port generated traffic on the TEN-T network.

Stakeholder Involvement

Stakeholder input is needed to validate the quantitative analysis, and to inform the process of option assessment. This will include recommendations in relation to the port and maritime aspects of the core network. The focus of this work will be a stakeholder event to be held on the 7th July 2010 in Brussels, in which methodologies and interim results can be discussed.

Please R.S.V.P. before 27th June
