

Designing a cruise terminal at Miami

Bruno Ramos

Principal-in-charge
BEA Architects

BIOGRAPHY

Bruno-Elias Ramos, AIA, an award-winning architect, received his Master of Architecture and Bachelor of Design degrees from the University of Florida. He is the founder of BEA architects, Inc., an architectural, planning and engineering firm which specializes in innovative port infrastructure with an area of concentration in Cruise and Passenger terminal planning and design. BEA is a world leader in transportation architecture and has set industry standards with unique, state-of-the-art terminal designs which have created the “seamless passenger experience.” Having served as architectural consultants to most major cruise lines, BEA's designs have changed the way the industry processes passengers through cruise terminals while improving the logistics and turn-around times of the cruise embarkation and disembarkation process.

In addition to projects throughout U.S. ports, BEA also has extensive international experience with ports in Canada, the Caribbean, South/Central America, Europe and Asia. Mr. Ramos has served as delegate and/or guest speaker at several notable industry conferences around the globe. Headquartered in Miami, Florida, BEA's designs have been featured in U.S. Architecture, Architectural Record, Architecture, PCI Journal, Abitare, Competitions and La Vanguardia periodicals.

Since 1994 EFIP has been the voice of the inland ports in Europe. EFIP highlights and promotes the role of inland ports as multi-modal hubs.

EFIP actively follows all developments in the field of EU policy of importance to inland ports and represents the inland ports vis-à-vis the European institutions and other international bodies.
