A photograph of two large, white, cylindrical industrial storage tanks with blue horizontal bands. They are situated outdoors under a clear blue sky with some light clouds. A metal walkway with railings connects the tops of the two tanks. In the background, a tall, grey industrial chimney with red and white horizontal stripes is visible. The overall scene is industrial and clean.

50%

OF OUR TRAFFIC IS GENERATED IN
THE INDUSTRIAL AREA

Draughts of up to 30 m

Total surface: 402 ha
Berthing line: 21 km
Draught up to: 30 m
Covered storage surface: 530,600 sq m
Cold storage capacity: 25,000 m³

We work for intermodality

CON-RO
Y RO-RO

BILBAO CONNECTS TO MORE THAN
900 PORTS WORLDWIDE

Excellent maritime connections to Europe and America

Dry ports network & railway services to the main Spanish logistics hubs

Rail operations rate:

12% of total traffic

23% of containers

19% of general cargo

We work for connection

More than 95 weekly railway services to/from the port terminals

Leading North America
Corporations call regularly at
the Port of Bilbao:

Berth 3

Berthing line: 355 m
Surface area: 27,413 sq. m
Draught: 12 m
Passenger station: Yes

Berths 1 & 2

Berthing line: (366+318) 684 m
Surface area: 6,750 sq. M
Draught: 11 m
Passenger station: Yes

CRUISE TERMINAL

We plan the future

to boost cruise tourism into Bizkaia and the Basque Country

Constant Evolution

Since 1991 we have been investing to provide the port new land and new berths.

Years	1991	2019
Surface	150 ha	402 ha
Berthing line	13 km	21 km
Drafts in the commercial area	hasta 14 m	hasta 21 m

Facts & Figures

- 402 ha of surface area
- 21 km of berthing line
- 30 m of maximum draught
- Dry ports: 7
- 35.6 Million tons of goods handled
- 638,631 TEUs
- 200,631 passengers
- Connected to more than 900 ports
- 2,925 vessel calls
- 5,000 trains
- 876,000 lorries
- E-commerce platform with more than 13 services

Bilbao PORT B

Challenges

- ❖ Logistic chains are in constant **competition**
 - ✓ Faster transport
 - ✓ Reliability, security, efficiency
 - ✓ Cost
- ❖ Chains **sustainability** and their environmental impact is a growing concern
 - ✓ CO2 footprint
 - ✓ Water and air quality
 - ✓ Flora & fauna
- ❖ **Data** to measure the performance of logistics operations K to improve and to provide customers with real time **information** on the service given.
