ESPO **ensures that seaports have a clear voice in the European Union:** it represents the common interests and promotes the common views and values of its members to the European institutions and its policy makers.

ESPO **represents the port authorities, port associations and port administrations** of the seaports of 23 Member States of the European Union and Norway at EU political level. ESPO also has observer members in Iceland, Ukraine and Israel.

ESPO's **mission is to influence public policy in the European Union in order to achieve a safe, efficient and environmentally sustainable European port sector**, operating as a key element of a transport industry where free and undistorted market conditions prevail, as far as practicable.

Foreword

As the EU's seventh Commission comes into being, we will look back at the five years of the Juncker Commission as a decisive period in the development of EU ports policy.

After two previous unsuccessful attempts to introduce a package of measures to regulate the port sector, a comprehensive framework was created in recent years in the form of the Port Regulation (2017), the expansion of the Global Block Exemption Regulation to cover ports (2017), the Port Reception Facilities Directive (2019) and completion of the European Maritime Single Window environment (2019).

All of these measures required detailed consultation between the port sector, the Commission, the European Parliament and the Member States. The ultimate framework that has emerged is a sensible and workable compromise, addressing most of our concerns. Particular thanks are due to outgoing Commissioner Bulc and her team, and to the Members of the last European Parliament who worked so assiduously on these important legislative initiatives.

Seldom can an incoming Commission President have been faced by a more challenging agenda. Ursula von der Leyen's leitmotiv of *strive for more at home to lead in the world* resonates with ports. In particular, we very much welcome the new President's headline ambition for a European Green Deal as a way to address the existential challenges of decarbonisation and climate change.

Ports are the gateways for international trade in hydrocarbons and 40% of port volumes are energy related. Ports have an active role to play in the green transition. Ports exist to serve the needs of shipping and are "the face" of the maritime industry on land. International shipping accounts for 2.2% of greenhouse gas emissions and the IMO has committed to reducing these at least by 50% by 2050 (compared to 2008 levels). With the 2018 target, a big first step has been made at IMO level, and now the shipping sector needs to implement it. The transition to sustainable fuels is the first priority. There are many different options being prepared and deployed, however there is no silver bullet. This makes it difficult for ports to make long term choices and invest in the required infrastructure. A lot of dialogue between all stakeholders involved will be needed. It will require a policy that is ambitious, but flexible; a policy that encourages innovation without picking one specific technology over another; a policy that achieves at the same time carbon savings and air quality benefits.

ESPO unequivocally supports decarbonisation and the energy transition; a commitment we confirmed when we set out our priorities for the five years from 2019 to 2024 in our memorandum *What ports do for Europe What Europe can do for ports*, first presented at the ESPO Conference in Livorno of May 2019. The diversity of issues facing EU ports was reflected both in the contents of the memorandum and in the conference's agenda.

As we try to address these huge environmental and industry challenges, ports must remain relevant and connected to the society we serve. ESPO has understood this since its foundation and, for many years now, we have encouraged and supported member ports to address the challenge of societal integration. As part of this, ESPO has made the theme for the 11th edition of its award *Transparency and the role of social media in reaching out to the local community*.

ESPO's success as the representative body of Europe's port sector depends mostly on the work of our Committees and I would like to thank all of the port and port association executives who give their time and expertise to attend meetings and contribute to this important work. It is particularly important that our Committees are representative of ports throughout Europe, from the Baltic all the way to the Black Sea and I would urge all ports and port associations to encourage executives and officials to participate in the work of ESPO.

As a sign of growing participation, we have held Executive Committee meetings during the year in Riga and Trieste.

We also held the first meeting of the Port Business Platform in July 2019 on the theme of co-operation and merger between European Seaports. I would like to thank Daan Schalck (CEO of North Sea Port), Zeno D'Agostino (President of the Port Network Authority of Eastern Adriatic Sea and Vice-Chairman ESPO) and Guy Janssens (Chief Corporate Affairs of Port of Antwerp) for agreeing to contribute their thoughts and insights. I believe that the Port Business Platform will become an ever more important part of the work of ESPO, allowing ports to learn from each other and, in doing so, help ESPO to better reflect the diverse needs of European ports in our ongoing engagement with the Commission and the Parliament.

Elsewhere, both the EU and ESPO face the continuing uncertainty because of Brexit. What I said in the foreword to last year's Annual Report remains true: we simply do not know today what the outcome of Brexit will be. One thing we can all learn from the experience of Brexit is the damage which prolonged uncertainty can do.

If we can see little other than the negative in Brexit, we should at least take from it a commitment to work determinedly and expeditiously on the wider policy issues facing our sector particularly on the challenges of climate change, digitalisation and the safeguarding of a free and open trade environment. We know we cannot waste time.

I would like to thank the former Chairs for their continued guidance, support and continued participation in the work of our Committees. Furthermore, I would like to thank Annaleena Mäkilä and Zeno D'Agostino for their work as Vice Chairs.

ESPO is only as good as its executive team and we are very fortunate to have an excellent team ably led by Isabelle Ryckbost. The success of ESPO requires a professional and proactive engagement with the Commission, the Parliament and with other representative organisations. This remains particularly true now as we face common challenges in achieving sustainability in our sector and throughout the supply chain.

Eamonn O'Reilly
ESPO Chairman

ESPO's Structure

ESPO's membership consists of port authorities, port administrations and port associations of the seaports of the European Union and Norway. Furthermore, the organisation is open to observer Members from European countries adjacent to the EU. ESPO currently has observer members in Iceland, Ukraine and Israel.

The membership structure is organised on a national level. This finds its reflection in the General Assembly of the organisation, where each EU member state, as well as Norway, has three official delegates with voting rights. Observer members have one delegate each.

The General Assembly sets the overall policy of the organisation and meets twice a year. It elects the Chairman and two Vice-Chairmen. For the period 2018-2020, ESPO is chaired by Eamonn O'Reilly (Ireland), assisted by Vice-Chairmen Annaleena Mäkilä (Finland) and Zeno D'Agostino (Italy). The General Assembly mandates the daily policy-making of the organisation to the Executive Committee, which consists of one representative per member state and, upon invitation, representatives of observer countries. The Executive Committee meets about five times a year.

Eamonn O'Reilly

Zeno D'Agostino
President of Assoporti and of
the Port Network Authority of
the Eastern Adriatic Sea

ESPO Committees

Technical expertise and advisor input come from the [Technical Committees and Networks](#) on the following topics:

Port Governance – chaired by Santiago Garcia Mila (ES)
Intermodal Logistics and Industry – chaired by Jean-Pierre Chalus (FR)
Marine Affairs – chaired by Claus Holm Christensen (DK)
Trade Facilitation, Customs and Security – chaired by Kristin van Kesteren-Stefan (BE)
Sustainable Development – chaired by Edvard Molitor (SE)
Cruise and Ferry Port Network – chaired by Antonio Revedin (IT)
Social Dialogue – chaired by Carmen Costache (RO)
Economic Analysis and Statistics – chaired by Aernoud Willeumier (NL)
Blue Growth Network – chaired by Carlos Botana (ES)

These specialised Committees and Networks are made up of experts from the member ports and are coordinated by ESPO staff. The recommendations of the technical Committees are submitted to ESPO's Executive Committee who then take the final decision on the issue at hand.

This year, as a result of an overlap in work, the General Assembly decided to [merge the Trade Facilitation, Customs and Security and Marine Affairs Committees](#) into one Committee with two sub-Committees, one on Marine Affairs and one on Trade Facilitation. It was also decided that a Network should be set up on Blue Growth to prepare the work of the blue growth subgroup of the European Ports Forum.

[In what follows, an overview of each Committee's work for the past year will be provided.](#) Main topics for each group can be identified under the 'Year in Brief' summaries.

This report presents ESPO's work for the period October 2018 until October 2019.

PORT GOVERNANCE

THE YEAR IN BRIEF

- ❖ Participation in the European Ports Forum
- ❖ Follow up monitoring of the implementation of the Port Services Regulation with members
- ❖ Contribution to the public consultation on the evaluation of the Consortia Block Exemption Regulation (BER)

The Port Governance Committee has been ESPO's main forum to follow the legislative process of the **Port Services Regulation** (EU) 2017/352¹ and remains central for members to voice concerns and exchange experiences on the implementation of the Regulation since it became applicable on 24 March 2019.

The European Commission set up the **European Ports Forum** with the objective of following up on the implementation of the Port Services Regulation (PSR). The forum features two subgroups, one on "Sustainable Ports", which had its first meeting in April 2019 and one on "Blue Growth", still to be set up. While actively participating in the meetings as one of the main stakeholders, ESPO has continued to call for stronger port representation at the forum. As port issues are at the core of the forum, stronger representation of European ports will facilitate an effective platform for exchange of best practices and existing bottom up initiatives, in addition to accompanying the implementation of the PSR.

Within the framework of the Port Governance Committee, ESPO has continued to monitor the European Commission's **inquiries into the different national tax regimes related to ports**. After having taken decisions on the Netherlands (2016), Belgium (2017) and France (2017), the Commission adopted recommendations for Spain and Italy in

January 2019. Belgium and France appealed the decisions before the European Court of Justice (ECJ), but the Court rejected both appeals. ESPO will continue to monitor the issue and to facilitate the exchange between members on the different tax systems.

ESPO participated in the public consultation on **the evaluation of the Consortia Block Exemption Regulation (BER)**.² The Regulation allows, under certain conditions, shipping lines with a combined market share of below 30% to enter into cooperation agreements to provide joint cargo transport services without notifying the Commission. The current exemption will expire on 25 April 2020. Thus, the Commission is due to take a decision on whether to prolong the Regulation by 5 years with or without an amendment, or to let it expire. ESPO emphasised the need for more transparency on the current state of alliances, as well as increased monitoring by the Commission of both vertical and horizontal alliances, especially in terms of their negotiating power and pressure on the ports' investment policies. The Commission is due to put together a staff working paper containing a technical assessment to prepare the incoming Commissioner, who is expected to make the final decision in 2020.

In May 2019, the European Commission published the study "**Sustainable Transport Infrastructure Charging and Internalisation**

of Transport Externalities", which has been discussed in the Port Governance Committee from the governance perspective (for more information, see section on Sustainable Development p.20). ESPO will continue to follow-up any initiative by the new Commission on this subject.

Within the framework of the **Connecting Europe Facility 2021-2027 (CEF II)** and the **TEN-T evaluation**, the Port Governance Committee dealt with the topics of **military mobility and port clusters**. Under CEF II, the Commission proposed to include a new funding envelope of €6.5bn for dual-use infrastructure (infrastructure that can serve both military and civilian purposes). After the Member States defined their military requirements in 2018, the European Commission consulted ESPO in 2019 on the civilian port requirements, which will feed into the definition of the dual-use requirements by the Commission. In relation to the forthcoming

review of the TEN-T guidelines (see also Intermodal, Logistics and Industry p.11), the Committee discussed the notion of "port clusters". The concept had already been acknowledged in the Staff Working Paper accompanying the current TEN-T regulation. As European ports are increasingly involved in a process of cooperation, clustering and merging, ESPO sees the necessity to further develop and define the concept of "port clusters" for the future TEN-T guidelines.

Throughout the year, work on the digitalisation of the **ESPO Fact Finding Questionnaire** on port governance has continued. The data collected in the 2015 survey has been integrated into the PortinSights platform. Future fact-finding exercises, which are carried out every five years, will be fully operational on ESPO's new online data platform PortinSights (for more information, see section on Economic Analysis and Statistics p.30).

INTERMODAL, LOGISTICS & INDUSTRY

THE YEAR IN BRIEF

- ❖ Work towards increased budget for transport and ports in CEF II as part of the Multiannual Financial Framework (MFF) negotiations
- ❖ Contribution to the evaluation of the TEN-T guidelines
- ❖ Preparation of joint ESPO-EFIP position paper on rail
- ❖ Support given to members for CEF Transport Calls

This year's work focused on the European Commission's [proposal for the 2021-2027 Connecting Europe Facility \(CEF II\)](#),³ the EU's main financial instrument for transport. The Commission proposed a total transport budget of €30.6bn, of which €12.8bn are earmarked for the general envelope, €11.3bn for the cohesion envelope and €6.5bn for military mobility. In March 2019, the European Parliament reached a Common Understanding on all provisions, excluding the budget and horizontal issues, which will be decided in the negotiations on the Multiannual-Financial Framework (MFF) and the respective legislative files.

In light of the negotiations on the future EU budget, [ESPO strongly supported the increased budget of €33.5 bn requested by the European Parliament](#), as it considers the Commission's proposal insufficient to complete the TEN-T network and to provide for a safe, modern and sustainable transport network. ESPO has also been advocating for an increased share for ports in the transport budget, which only received 4% of the CEF budget in the last few years. The budget will be decided within the MFF negotiations, expected to start at the end of 2019. To give the transport sector a strong voice for the negotiations, ESPO renewed its work with the

40 organisations of the "EU budget for transport" coalition, launching an updated campaign for the new Parliament and Commission.⁴

€33.5 bn: EP's proposal for transport budget. ESPO continues to lead efforts to ensure the increased transport budget through the "EU budget for transport" coalition.

Another important aspect of the CEF II proposal is [the military mobility envelope](#). For the first time, a budget has been allocated for the purpose of developing dual-use infrastructure. ESPO members requested a clear prioritisation of the civil transport use over the military use in any dual-use projects and invited the Commission to provide more transparency and clarity about the modalities of this priority. ESPO gave its input for the targeted consultation on the civilian port requirements, which will feed into the definition of the dual-use requirements by the Commission.

The [2019 CEF Transport Call](#) for proposals opened for applications on 8 January 2019. [The Call, with a total budget of €117 million, was available for ports of the comprehensive network only](#). The Call priorities covered reducing the noise

³ <https://ec.europa.eu/digital-single-market/en/news/connecting-europe-facility-2021-2027-commission-launches-public-consultation-cef2-digital>

⁴ <https://www.espo.be/news/more-than-40-organisations-jointly-call-for-a-stro>

generated by freight trains, developing and improving cross-border railway links and upgrading crucial infrastructure in ports. The Commission announced the project selection on 27 September, which included 18 port projects.

€117 million: total budget of 2019 CEF Transport Call

In addition, on 16 October 2019 the Commission launched another CEF transport call with the returned funds from non-executed projects. The call has an overall budget of €1.4 billion, available to the Core Network, as well as Motorways of the Sea (MoS) projects (€30 million). The deadline for submitting application under this call is 27 February 2020.

In mid-November 2019 a further rolling call for the CEF Blending Facility is expected to be launched. The Blending Facility is a cooperation framework established between the European Commission and implementing partners to support blending operations for ERTMS and alternative fuels with quarterly cut-off dates until March 2021 (unless the budget is exhausted earlier).

In mid-2019, the Commission started [the evaluation of the current TEN-T guidelines with a public consultation as a first step in the review process](#). ESPO requested that the review recognises the changing role of ports and new market realities. In that regard, the ports' role as strategic nodes in the network should be stressed more over ports as simply a component of maritime infrastructure. Another essential point is to address ports' increasing involvement in a process of cooperation, clustering and merging by developing clear definitions and concepts. In general, ESPO sees the need for a stronger maritime dimension in the predominantly land-based corridor approach, both in terms of acknowledging the cross-border dimension of ports and by giving more importance to MoS.

The [new MoS Coordinator Kurt Bodewig](#) has structured the stakeholder exchanges by sea basin. ESPO participated in the meeting of the Atlantic basin in Dublin in April 2019 and will participate in the meeting of the western Mediterranean in Madrid in late October 2019. The remaining meetings will be organised in 2020.

The European Commission held a public consultation on its proposal to extend [the General Block Exemption Regulation \(GBER\)](#) to cover national co-funding in combination with certain EU funding programmes. The proposal suggests the extension of the GBER exemption when national funding is combined with InvestEU, Horizon Europe or European Territorial Cooperation (ETC) projects. ESPO participated in the consultation, requesting to additionally exempt funds combined with CEF funding under certain conditions. ESPO believes that the currently separate "CEF evaluation" and state aid procedures can cause unnecessary delays.

In the course of 2018 and 2019, [the rail expert group](#) held several meetings in preparation of a joint ESPO-EFIP position paper on rail, to be published in November 2019. In essence, the paper asks EU rail policy makers to consider the specificities of port-rail connections. Additionally, ESPO actively participated in the meeting of the national regulatory bodies for rail, discussing the definition and the implications of rail service facilities. Finally, ESPO was invited to join the interim governance board for the European Rail Facilities Portal.

In a joint effort with EFIP, ESPO conducted a survey in September among its members on [the potential of inland waterway transport](#). In the framework of the transport decarbonisation agenda, a modal shift to more sustainable transport modes can help to reach the set targets. ESPO will evaluate the received responses and proceed accordingly.

MARINE AFFAIRS

THE YEAR IN BRIEF

- ❖ The revision of the Port Reception Facilities Directive was high on the agenda
- ❖ Contribution to the European Commission's consultation on Places of Refuge

In January 2018, [the European Commission published a new proposal on the revision of the Port Reception Facilities Directive](#). The new Port Reception Facilities Directive 2019/883,⁵ which repeals the previous Directive 2000/59, entered into force on 27 June 2019 and has a transposition period of two years. Along with the Sustainable Development Committee, the Marine Affairs sub-Committee followed all relevant developments closely before finalising ESPO's position paper on the issue.

ESPO welcomed the conclusion of the revision as a step towards more efficiency: the new directive aims at streamlining administrative procedures, addressing discrepancies between EU and international law and achieving higher levels of environmental protection.⁶ However, a number of issues remained, particularly regarding enforcement of the "polluter pays" principle and mandatory rebates.

ESPO [regretted the initial proposal envisaging a flat fee irrespective of waste generated](#). Without a cap on the amount of waste allowed to be generated – and a higher fee charged over that cap – producers would have no incentive to curtail waste production; in some cases unreasonable quantities of waste may be produced. [ESPO welcomed an improved submission from the parliament and the council providing for a cap](#), over which the fixed fee would not apply, but nonetheless regrets the possibility of more efficient waste producers subsidising less

efficient producers under the fixed price system.

ESPO [approved the provision for differentiated fees](#) on the basis of the hazardous nature of the waste and welcomed the revision from the Parliament and the Council with regard to the [communication of the fee systems](#) in the waste reception and handling plans. Under the new law, only the structure of the costs and a description of the cost recovery systems will be communicated to the port users. Furthermore, ESPO [welcomed the provision of special exemptions](#) for small non-commercial ports as well as for remotely located ports and small ports with unmanned facilities.

However, European ports concurred that, contrary to the legislation's provisions, [a separate collection of ship waste should be organised](#) on the basis of EU law and given that food packaging including plastic waste from intra-EU journeys could now be recycled. Moreover, ESPO [regretted that green rebates for ships have become mandatory](#), as these mandatory rebates will not ensure that less waste is delivered at port level.

Port Reception Facilities Directive

- ✓ Cap on waste quantity under fixed fee regime
- ✓ Provision of Differentiated Fees
- ✓ Communication of fee systems
- ✓ Special exemptions for small and remote ports
- ✓ Separate collection of ship waste should be organised
 - ✗ Mandatory Green Rebates
 - ✗ Subsidising efficient waste producers under fixed fee system

The Marine Affairs sub-Committee followed and discussed the latest developments with regard to [places of refuge](#). ESPO contributed to the consultation of the European Commission and successfully convinced the EU to submit a follow-up to the IMO. ESPO emphasised that ports which accommodate a ship that has been granted a place of refuge must receive prompt and appropriate compensation in respect of liabilities that arise from the accommodation of a damaged ship. In addition, the Marine Affairs sub-Committee followed the developments in the Safe Sea Net Group Meeting of experts organised by EMSA.

TRADE FACILITATION, CUSTOMS & SECURITY

THE YEAR IN BRIEF

- ❖ Defence of European ports' interests in the developments of the European Maritime Single Window environment Regulation, including publication of a position paper
- ❖ Follow-up of Brexit developments Digital Transport and Logistics Forum (DTLF) and cybersecurity issues

This year, the Trade Facilitation, Customs and Security sub-Committee, together with the Marine Affairs sub-Committee, focused on the legislative process leading up to the **Regulation establishing a European Maritime Single Window environment 2019/1239 (EMSWe Regulation)**.⁷

In May 2018, the Commission published its proposal for a regulation establishing a EMSWe, concluding the revision process of the Reporting Formalities Directive (2010/65) launched in Spring 2016. In short, the proposal was built on three main pillars. First, it establishes harmonised National Single Windows, while retaining existing Port Community Systems as (voluntary) reporting channels. Second, the proposal establishes a harmonised maximum data set, containing all requirements stemming from national, EU and international legislation. Finally, it contains the reporting once principle, enabling a declarant (shipowner or his representative) to submit information only once per port call, so that the information can be reused on subsequent port calls.

On 24 September 2018, **ESPO published its position paper** on the new proposal, asking for more ambition on the harmonisation of data, while maintaining flexibility in reporting systems. On 15 October, rapporteur Deirdre Clune (EPP, Ireland) published her draft report on the proposal. ESPO welcomed the

rapporteur's report, which in general reflected European ports' priorities, especially the possibility for ports to continue to make use of their Port Community Systems as entry gates for information submitted by declarants (the shipowner or his representative). The final report of the Transport Committee was well received by ESPO, with the exception of a proposal to investigate the establishment of a centralised European Maritime Single Window interface. On 7 February, the Parliament and Council agreed on a final text, leaving out the proposal for a centralised interface. The final text was welcomed by ESPO and published in the official journal on 25 July 2019. The Commission has set up a number of groups in preparation of the implementation of the regulation. ESPO will closely monitor the work being done in those groups and stay closely involved to defend the interests of European ports. The new regulation is expected to apply as from 2025.

Ever since the referendum on British membership of the EU took place in 2016, **Brexit** has continued to feature as a major item on ESPO's agenda. This year, the Trade Facilitation sub-Committee closely monitored all relevant developments with regards to the negotiations and provided a platform to exchange good practices for ports in order to prepare for Brexit. ESPO will continue to monitor all relevant developments and will adopt an active role in the second phase of

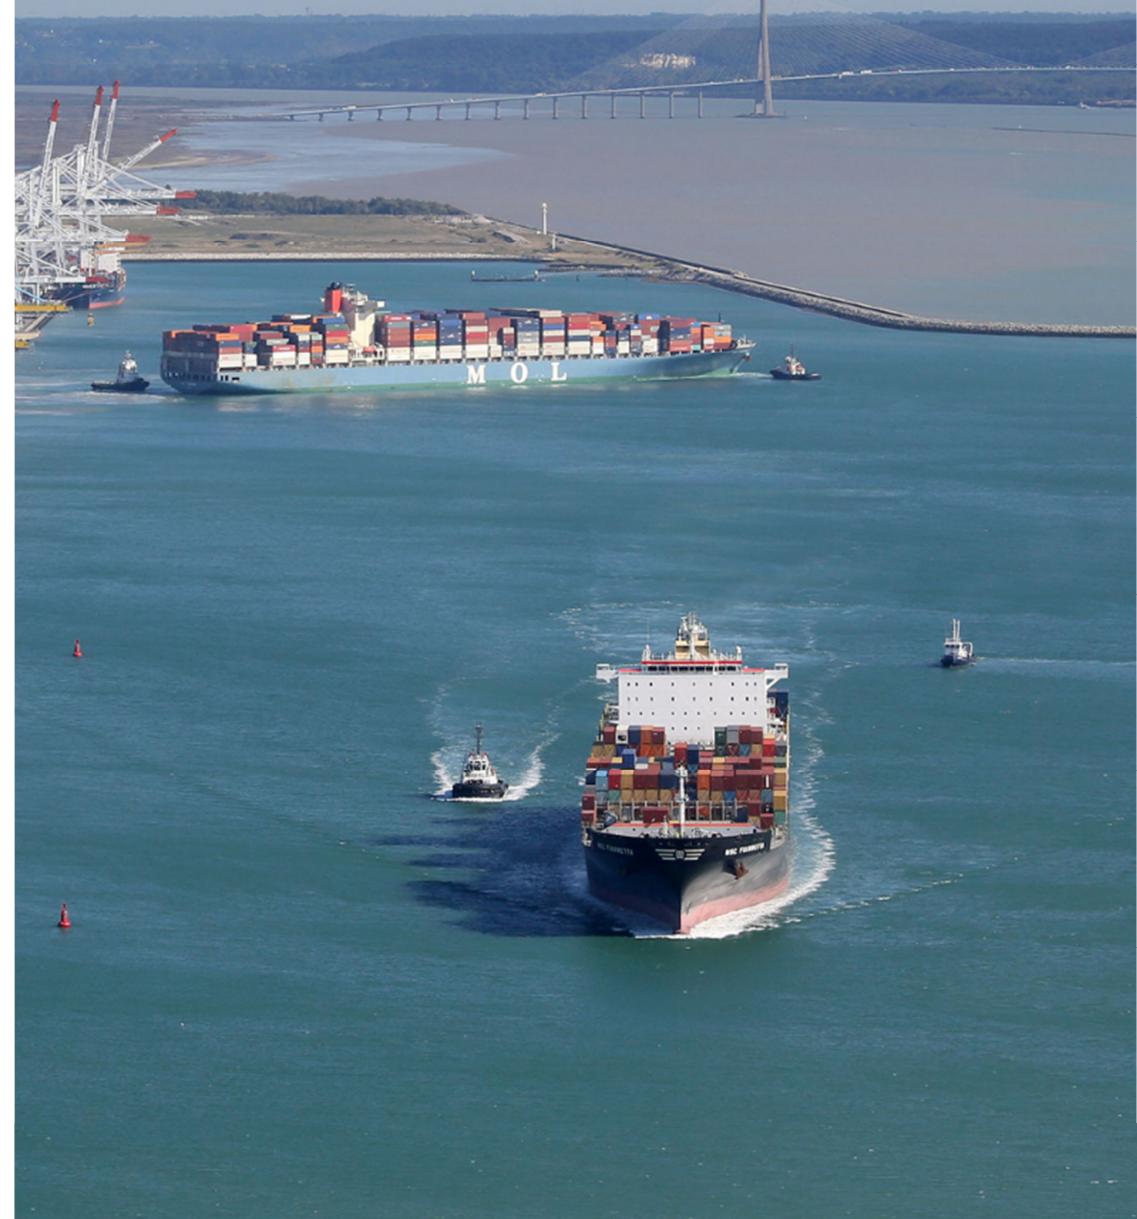

⁷ <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32019R1239&from=EN>

negotiations (if and when a Brexit deal is reached) with the aim of preserving an optimal EU-UK trade environment.

Over the last working year, ESPO continued to follow EU initiatives in the field of digitalisation, remaining active in the **Digital Transport and Logistics Forum (DTLF)**.⁸ This forum has brought together Member States and stakeholders from all transport and logistics communities to support the digitalisation of freight transport and logistics. In particular, the forum aims to identify areas where common action in the EU is needed, providing recommendations and implementing proposals where appropriate.

Finally, **cybersecurity** and the Directive concerning measures for a high common level of security of network and information systems across the Union (NIS Directive, 2016/1148)⁹ also appeared on this year's agenda of the Trade Facilitation sub-Committee. Besides the exchange of best practices on cybersecurity for ports, the sub-Committee followed up the implementation of the NIS Directive. As cybersecurity in maritime transport climbs ever higher up the agenda of EU policy makers, ESPO will endeavour to closely monitor relevant developments in the field.

SUSTAINABLE DEVELOPMENT

⁸ <http://www.dtlf.eu/>

⁹ <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32016L1148&format=EN>

THE YEAR IN BRIEF

- ❖ Contribution to the European Sustainable Shipping Forum, the 'Navigating a Changing Climate' coalition and the Sustainable Transport Forum
- ❖ Follow-up of Parliament's work on Onshore Power Supply (OPS), monitoring of Commission's initiatives for Alternative fuels Infrastructure and water quality
- ❖ Publication of 2018 Environmental Report, alongside continued management of EcoPorts and PERS Certification

This year, ESPO renewed its active participation in the [European Sustainable Shipping Forum \(ESSF\)](#). ESPO took part in the discussions with regard to the scope and the deliverables of the new sub-groups, while at the same time following the work of the ESSF sub-group on Air Emissions from Shipping. ESPO also participated in the work of the newly established Sustainable Ports sub-group under the European Ports Forum.

ESPO continued supporting the objectives of the [Navigating a Changing Climate coalition](#).¹⁰ The coalition brings together nine associations that have committed to reduce greenhouse gas emissions and to shift to low carbon maritime or inland navigation infrastructure, as well as to act urgently to improve preparedness to adapt to the changing climate. Furthermore, ESPO followed the work of the EU Water Framework Directive (WFD) Navigation Task Group where key issues for industry stakeholders are discussed and identified. ESPO participated in meetings with the consultants responsible for the Fitness Check and fed into the consultation process.

ESPO contributed to the work of the [Sustainable Transport Forum](#) of the European Commission which is the main consultation body with regard to the implementation of the Alternative Fuels Infrastructure Directive. In particular, ESPO

participated in consultation rounds regarding the deployment of alternative fuels infrastructure in preparation of a potential review of the Directive.

In the same vein, ESPO welcomed the European Parliament's support for its longstanding proposal to tax-exempt [Onshore Power Supply \(OPS\)](#) for ships at berth.¹¹ Taxation on shore-side electricity has been a significant barrier for the uptake of this form of energy over power generated onboard, weakening in each case the business case for OPS. ESPO believes that a permanent and EU wide tax exemption for the use of shore-side electricity under the Energy Taxation Directive would put it on an equal footing with electricity generated on board (produced from the combustion of tax-exempted marine fuel). In general, with regard to all alternative fuels, the risk is that there is currently no market for certain investments, or that certain investments will be outdated before the pay-back period of the investment. To avoid the chicken or the egg dilemma, policy measures on the port side should be accompanied by corresponding measures for the users.

[Alternative fuels infrastructure](#) has been another focus of the Sustainable Development Committee's work. Aiming to begin an open dialogue, ESPO invited Commission officials,

infrastructure and fuel experts, shipping stakeholders and NGOs to the internal meetings of the Committee.

Furthermore, ESPO conveyed to EU policy makers and stakeholders the message that a gradual but mandatory transition plan to cleaner fuels must be developed which delivers both in terms of air quality and decarbonisation. In particular, ESPO asked policymakers to start the discussion on the implementation of an EU Emission Control Area (SECA and NECA), in close cooperation with all relevant stakeholders.

With regard to [water quality](#), ESPO supported an EU proposal to discuss a harmonised approach on scrubbers at IMO level.¹² The proposal aims to start the discussion at international level on the discharges from scrubbers into the water, especially in sensitive areas such as ports. To protect the water quality and to respect the EU standards provided for by the Water Framework Directive, some EU Member States have taken initiatives to limit liquid discharges from scrubbers in port areas. ESPO supported the proposal for prompt and harmonised action on the basis of scientific evidence available with regard to the impact of liquid discharges from scrubbers on water quality. The proposal was accepted by the IMO member states during the meeting of the Marine Environment Protection Committee (MEPC 74).

This year also saw the publication of the European Commission's long-awaited study '[Transport Infrastructure Charging and Internalisation of Transport Externalities](#)'. The paper has the core aim of examining to what extent the principles of 'user pays' and 'polluter pays' are realised in the European transport sector. Relevant conclusions for maritime transport include: alternative EU-wide instruments may be preferred for transport taxes/charges, given the difficulty of

EU-wide harmonisation; non-pricing instruments can be applied in a harmonised way at EU level; and environmentally differentiated port charges or fairway dues may be options to further internalise the air pollution cost of maritime transport. The paper is set to become an integral part of future transport policy. ESPO will thus continue to closely monitor relevant developments.

Furthermore, ESPO published its [annual Environmental Report for 2018](#)¹³ at the GreenPort Congress in Valencia in October 2018. The report has become a point of reference for all interested stakeholders, local communities, civil society, researchers and industry.

[Air quality](#) retained its position as the top priority for European ports, a place it has held since 2013. Interest in the [relationship with local community](#) rose to fourth position, possibly reflecting air quality's standing as a concern for citizens of port cities and urban areas. Similarly, [climate change](#) is becoming an issue of high priority for European ports, having entered the Top 10 for the first time in 2017 and climbed to seventh position in 2018.

New survey questions this year revealed the [significance of climate change](#) for port project planning:

- ❖ **8/10 European ports** take climate change into consideration when they develop new infrastructure projects
- ❖ **59%** of ports strengthen the climate resilience of existing infrastructure
- ❖ **41%** of ports have already dealt with operational challenges due to climate change

[Marine litter](#)-related priorities rose in importance. [Waste](#) remained the most monitored issue with the number of respondents declaring to monitor this

¹¹ <https://www.espo.be/news/european-ports-welcome-parliaments-explicit-suppor>

¹² <https://www.espo.be/news/espo-supports-eu-proposal-to-discuss-a-harmonized->

¹³ <https://www.espo.be/media/ESPO%20Environmental%20Report%202018.pdf>

indicator having increased 17% since 2013. 73% of ports are certified with an **environmental standard** (ISO, EMAS, PERS) – an increase of 19% since 2013. 68% of ports currently make their environmental report publicly available. These figures clearly demonstrate the readiness of ports to address environmental issues such as marine litter.

On the development of **alternative fuels infrastructure**, the report finds:

- 51% of ports provide shore-side electricity for ships at berth
- 30% of ports provide LNG refuelling points
- 24% of ports are currently developing LNG infrastructure projects

Set up in 1997, **EcoPorts**¹⁴ is the main bottom-up initiative of European ports to address the

environmental challenges the sector faces. After the revision of the Self Diagnosis Method (SDM) and the Port Environmental Review System (PERS) in 2017, the number of EcoPorts members and PERS certified ports has steadily increased, showing that the sector is ready to address the environmental challenges, increase transparency in communicating their environmental policies, build an even closer relationship with port cities' communities and enhance their market reputation. Both SDM and PERS are now listed as a source of Good International Industry Practices by the World Bank. The European Investment Bank and the European Bank for Reconstruction and Development are also considering these tools as a reference in their assessment of projects. Below you can find a list of all the ports that are PERS certified as of October 2019.

CRUISE AND FERRY

THE YEAR IN BRIEF

- ❖ Assessment of externalities related to cruise activity in ports
- ❖ Follow-up on Commission study on Security Measures for Ro-Ro ferries

This year, work in the Cruise and Ferry Port Network (CFPN) focused on the **externalities of cruise and ferry traffic** in European ports. In particular, the Network exchanged views and best practices on how to cope with issues like air pollution and tourist saturation. In this context, the Network conducted a small survey to identify how ports are dealing with challenges such as sustainability and the relationship with the local community. The results of this survey were discussed internally, as well as with representatives of the cruise lines.

European ports aim at developing their cruise activities in a sustainable way, finding the right balance between their role as entry gates for visitors wanting to experience Europe's cultural and natural heritage and the need to safeguard the way of life of local communities.

ESPO has continued to follow up on a **study on security measures for Ro-Ro ferries**, which was commissioned by DG MOVE and conducted by ICF Consulting Services Limited (ICF). The aim of the study was to analyse maritime security aspects and measures in place for Ro-Ro ferries in Europe and assess the case to improve those maritime security

measures. The study focused primarily on one threat, namely attacks conducted by terrorists and/or violent extremist groups or individuals with criminal motives. In this context, the study examines the security measures in place both on the ferry side as well as on the port side.

ESPO has been following all relevant developments as well as supporting the Commission with respect to the **pan-European and regional cruise dialogues**. Furthermore, the Cruise and Ferry Port Network, together with the Marine Affairs and Sustainable Development Committees, continued to follow all relevant developments of the revision of the **Port Reception Facilities Directive** (see section on Marine Affairs p.14 for more information).

Finally, the Cruise and Ferry Port Network will gather in Oslo for the **GreenPort Cruise Conference** on 16 October 2019. The Network traditionally plays an active role in this conference, which brings together relevant stakeholders of the cruise port industry to discuss the environmental agenda of cruise ports.

SOCIAL DIALOGUE

THE YEAR IN BRIEF

- ❖ Finalisation of the study “The changing face of ports: socio-economic impact of market-based and technological developments on EU ports”
- ❖ Monitoring of the implementation of the directive on safe loading and unloading of bulk carriers
 - ❖ Set-up of working group on fumigation of containers
 - ❖ Efforts continued to support and boost gender inclusivity in the sector

For six years now, the [Sectoral Social Dialogue Committee on Ports \(SSDCP\)](#) has successfully brought EU employers' organisations (European Sea Ports Organisation and Federation of European Private Port Operators) and employees' organisations (European Transport Workers' Federation and International Dockworkers Council) together. These social partners jointly contribute not only to the improvement of working and living conditions for the people employed in the sector, but also to the competitiveness and productivity within EU ports. ESPO contributes to this Committee by assisting and representing those port authorities that are employing port workers.

The Social Dialogue Committee for ports finalised the work on the EU-financed study [“The changing face of ports: socio-economic impact of market-based and technological developments on EU ports”](#) with a study visit to Hamburg. The programme included a visit to the training centre Ma-Co and the Hamburg Vessel Coordination Centre, discussions with the HHLA and Eurogate terminal operator and works council about the recently agreed collective agreement (Eurogate), as well as the manager of the labour pool. ESPO participated in the study as an associate partner and was represented in the steering group, composed of the other social partner organisations (ETF, IDC and Feport), which is monitoring the advancement and reviewing the results of the study.

Safety on board ships has remained a point of concern, as the [implementation of the Directive on safe loading and unloading of bulk carriers](#) has been still very unsatisfactory. EMSA has started its visits to Member States to monitor the implementation of the Directive. In order to tackle the issue in a comprehensive manner, the Social Partners are envisioning a joint dialogue with the ship owners and seafarers.

Furthermore, the Social Partners set up a [working group on fumigation of containers](#), in order to develop guidelines based on best practices on “Training for port workers in relation to fumigated containers”. While the guidelines specifically deal with port workers and with the fumigation of containers, the Social partners recognise that risks exist along the entire logistics chain and that other health risks exist from entering containers. On 18 October, the final agreement was adopted. The objective of the agreement is to assist port operators and workers in creating a framework for identifying risk in their respective operations and training port workers.

ESPO continued to participate in the European Commission's initiative [“EU Platform for Change – Women in Transport”](#), launched in November 2017. The initiative's objective is to strengthen women's employment and equal opportunities in the transport sector through concrete actions and the exchange of good practices. ESPO participated in the annual

conference "Towards a more inclusive and diverse transport sector", where the concept of European diversity ambassadors was launched. Furthermore, ESPO has been actively monitoring the gender balance in Committee meetings to raise awareness and to ultimately improve it. In early 2019, the

outcome of ESPO's monitoring exercise revealed that overall 31,76% of port professionals attending technical Committee meetings were women, 68,24% men. Through publishing this information, ESPO hopes to support efforts for greater gender balance in the sector.

ECONOMIC ANALYSIS AND STATISTICS

BLUE GROWTH NETWORK

THE YEAR IN BRIEF

- ❖ Continued development of PortinSights
- ❖ Preparation of modal split data collection

ESPO's digital data platform **PortinSights**¹⁵ was launched in September 2018, having been developed based on the outcome of the EU co-funded FP7 project PORTOPIA.¹⁶ The data platform includes traffic throughput data (Rapid Exchange System, RES, data), environmental data (EcoPorts Data) and port governance data (Fact Finding Survey). Through PortinSights, ESPO promotes the voluntary data exchange between members and facilitates their data analysis. In terms of the RES data, PortinSights replaces ESPO's previous Excel data exchange system.

In the course of 2019, work continued to populate the platform with data. More than 70 European ports have signed up to the platform and many have started to upload their data. The Economic Analysis & Statistics Committee has been instrumental in the development of the platform, by exchanging experiences and providing feedback. This year's work has focused on drafting the template of the quarterly report, which is to feature the main developments and trends of different commodities, aggregated by port ranges. Once finalised, this report will be publicly

available on the ESPO website on a quarterly basis.

In addition, the members of the Economic Analysis and Statistics Committee continued their efforts to develop a **harmonised model for modal split data**. In order to calculate their modal split, European ports often rely on external parties for the necessary data to make the calculations. Despite this obstacle, the model has been improved, tested and finalised. Going forward, data collection will take place on an annual basis.

The **reduction of the EU's carbon footprint** is high on the agenda of the European Commission. Transport, as one of the main sources of the CO₂ emissions, will be closely in the focus, including the shift to more sustainable transport modes. The modal split data collection is essential to demonstrate the positive impacts of the initiatives taken by European ports to promote sustainable transport modes.

Finally, the Economic Analysis and Statistics Committee **renewed the exchange with Eurostat's maritime statistics unit**.

¹⁶portopia.eu

THE YEAR IN BRIEF

❖ Establishment of ESPO's Blue Growth Network

Following the European Commission's decision to establish a sub-group on Blue Growth under the European Ports forum (EPF), **ESPO decided to set up its own Blue Growth Network**. A first meeting of the ESPO Blue Growth Network was held in Brussels in June to discuss the internal organisation of its work and the election of its chair before the EPF sub-group begins to work.

Blue growth covers all marine-based or marine-related activities, not only in established but also in emerging and innovative sectors. Furthermore, among these sectors and activities are marine living resources, marine extraction of non-living resources, marine transport, port activities, shipbuilding and repair, coastal tourism, marine equipment and machinery, prepared seafood meals and manufacture of seafood oils and fats, desalination, blue renewable energy and blue bio economy.

According to the recent Commission report, almost 45% of the EU population (214 million people) live in coastal regions and blue economy directly employs over 4 million people with €658 billion of turnover and €180 billion of gross value added. Coastal tourism, marine living resources and port activities have grown by over 10% over the last 10 years and employment grew in coastal tourism by 10% and in port activities by 25% between 2009 and 2017.

Blue Growth in numbers

- ⇒ **45%** of the EU population – **214 million people** – live in coastal regions
- ⇒ Blue economy directly employs over **4 million people**
- ⇒ Blue growth adds **€658 billion** per year to the EU economy
- ⇒ **€180 billion** of gross value added

The constituent meeting of the new technical Committee took place on 26 June. In that meeting, the core tasks of the Blue Growth Network were decided as the following: to **discuss and put forward best practice**, to **highlight financial constraints** the sector faces when blue growth initiatives are taken and **follow the European Ports Forum Sub-group** when it starts its work.

(c) Port of Helsinki (Finland)

Year in Review

Overview of ESPO Activities in 2018-2019

Events organised, co-organised or supported:

- ESPO Award 2018 Ceremony, 7 November 2018, Brussels
- Transport Week 2019, 6-7 March 2019, Gdynia
- ESPO Conference 2019, 23-24 May 2019, Livorno
- Port Business Platform, 4 July 2019, Brussels
- GreenPort Cruise & Congress, 16 October 2019, Oslo

Publications:

- ESPO Award 2018 Booklet with Summary of Applications
- ESPO's Liber Amicorum: ESPO at 25: Connecting People and Ports
- ESPO Memorandum
- "More EU Budget for Transport, The Best Investment Plan for Europe", with EU transport Coalition
- ESPO Environmental Report 2019
- Top 10 Environmental Priorities 2019

Policy input:

- 8 January 2019, ESPO Contribution to the Consultation on the Evaluation of the Consortia Block Exemption Regulation
- 9 September 2019, TEN-T Review Consultation
- 30 September 2019, ESPO Contribution to the Public Consultation on the GBER

Information on the above events, publications and policy statements can be found on the ESPO website: www.espo.be, in particular under the sections 'Our events', 'Our publications', 'Our views' and 'Our news'.

2019 Conference "Europe's ports in a new world", Livorno

The 16th edition of the ESPO Conference took place on 23-24 May in Livorno, hosted by the Port Network Authority of the North Tyrrhenian Sea. The theme chosen this year was "Europe's ports in a new world", which encouraged an array of responses, from familiar themes such as new technologies and the climate transition to more novel themes such as geopolitical changes and ports' role in sustainable energy.

The first day kicked off with welcome speeches from Eamonn O'Reilly, ESPO's Chairman, and members of Italian national and regional governments. Sessions focused on new technologies – in particular the future of container transport, automation, road transport and port greening – and new players in transport, before a profile of the Italian maritime economy closed the first day's presentations. The second day began with a speech discussing the implementation of the 'polluter pays' principle in transport policy, before moving on to sessions considering geopolitical changes affecting the port sector and the changing face of ports. The conference ended with an insightful closing roundtable debating investment in the sector, sustainability and digitalisation.

ESPO took the opportunity of its Conference to present its memorandum, which presents ESPO's priorities for the next five years.¹⁷ The memorandum was created to coincide with the mandate of the new European Parliament and the new European Commission, who will both have begun their new five year terms by the end of 2019. Key messages in the memorandum include: ports' centrality to the transport sector's competitiveness, ports' role in the Europe's transport networks, digitalisation's contribution to growth, the need for cooperation to achieve decarbonisation and the importance of investment to achieve social goals in the future.

ESPO was hugely pleased with the outcome of the conference, and the warm reception from the city of Livorno. More than 240 people attended the conference, with participants including national and European officials, industry representatives, academics and business people. ESPO hopes to build even further upon this success at next year's conference. The 17th edition will take place in Oslo on 28-29 May 2020.¹⁸

ESPO Award on Social Integration

This year, the 10th edition of the ESPO Award continued its decade long record of rewarding and encouraging exciting projects from European ports. This year's theme was "Ports as a Good Work Environment For Everyone". Although the number of project submissions was lower than in previous years, quality and innovation were evident in each of the four entries. Submissions came from Associated British Ports, North Sea Port, Port of Rotterdam Authority and the Port of Tallinn.

The Port of Rotterdam emerged as winner for their project "The Port of Rotterdam creates a good working environment for everyone." The project was praised for tackling local challenges, such as high unemployment, and wider issues, such as making sure the future workforce have necessary skills to respond to changing environments. Specific initiatives included giving employees skills matching the needs of companies in the port, providing training for the port's current and future talents, and stimulating co-working between different companies within the port. In using their project to help schools, the unemployed and consolidate the skills of their existing workforce, the programme achieved the 2018 ESPO Award's aims of investing in a diverse and inclusive environment, facilitating mutual respect, non-discrimination and personal development.

The event was also a chance to celebrate ESPO's 25th anniversary. A concert and a birthday cake were organised to commemorate the milestone. Furthermore, ESPO also published a Liber Amicorum to celebrate the occasion. This book of friends gathered memories, anecdotes and reflections from diverse voices who have been part of ESPO's history, hopefully laying the ground for another 25 successful years ahead.

Looking forward, the theme for the ESPO Award 2019 is "Transparency and the role of social media in reaching out to the local community". Out of 9 submissions, a shortlist of 4 submissions has already been announced. The winner will be chosen from one of the ports of Dover, Dublin, Stockholm and Union des Ports de France (UPF) on 13 November 2019 at the 11th edition of the ESPO Award Ceremony.¹⁹

¹⁹ <https://www.espo.be/news/espo-award-jury-puts-the-ports-of-dublin-dover-sto>

ESPO Port Business Platform

ESPO built on its role as a knowledge network through the establishment of its Port Business Platform in July this year. The proposal for the platform was initially agreed in November 2018, as a means of bringing port executives and port strategy professionals together to discuss and exchange specific trends, challenges, strategies and best practices in the sector. The platform operates in full compliance with ESPO's Competition Compliance Guidelines.

The first meeting took place the European Port House on 4 July with the theme 'Cooperation and Merger between European Seaports'. The particular focus was on the question "Does the scale increase in different related sectors lead to stronger cooperation and/or merger between port managing bodies?" Initial presentations were given by Daan Schalck (CEO of North Sea Port), Zeno D'Agostino (President of the Port Network Authority of Eastern Adriatic Sea and Vice-Chairman of ESPO) and Guy Janssens (Chief Corporate Affairs of Port of Antwerp). Port professionals from across the continent actively contributed to a fruitful discussion, with pertinent planned or executed mergers used as examples.

ESPO looks forward to bringing together even more professionals at the next meeting provisionally planned in early 2020.

(c) North Sea Port

The platform's first meeting included a presentation on the recent merger of the Port of Ghent and the Port of Zeeland to form North Sea Port.

Port pro of the Month

Each month, ESPO interviews a CEO or Port Director from one of its member ports to highlight how each port works and to help us understand what it means to lead a European port. Below is the collection of the port pros from the past 12 months. Read the full interviews by clicking on the pictures below.

September 2019: Zeno D'Agostino (President of the Port Network Authority of Eastern Adriatic Sea and Vice-Chairman ESPO)

"The railway allows Trieste to be the only Italian port with a truly international catchment area, with more than 200 trains every week linking the port to key industrial and logistics hubs in 13 countries. One of our main strategic targets is a further increase of the modal share because we believe that rail intermodality is crucial for becoming more environmentally friendly."

August 2019: Joseph Bugeja (CEO and Chairman, Malta Transport Authority)

"The opportunities that can be provided by Malta in this sector stem from the Islands' rich maritime heritage with a cultural legacy intimately linked to the sea that is unique in the Mediterranean"

June 2019: Doug Bannister (CEO, Port of Dover)

"Where I want to see us in ten years' time is fully utilising [our] deep knowledge alongside technology and innovation to further improve the efficiency and effectiveness of our operation. I want to ensure that the enduring economic advantages of Dover's geographical position are matched by 21st century requirements for sustainability that ultimately delivers the best outcomes for all."

May 2019: Barbara Scheel Agersnap (CEO, Copenhagen Malmö Port)

"The biggest issue at present in our communication with the local population is related to the environment. We aim to use the most environmentally-friendly rolling stock."

April 2019: Brendan Keating (Chief Executive, Port of Cork)

"Going forward, and even in the face of continued uncertainties related to Brexit, the Port of Cork has much to be positive about as it expects to see further growth in traffic [...] the first direct service from Ireland to Spain, offers the option for freight carriers and passengers to bypass the UK and French landbridge to Spain as Brexit uncertainty continues [...]. This more efficient supply chain offers freight customers a direct route to the market, enabling them to get their produce to the market quicker than if they travel through traditional ports."

March 2019: Sotirios Theofanis (Chairman and CEO, Thessaloniki Port Authority)

"We can say that, based on my international experience, the port-city relationship in our case is a model case. The regeneration of the Old Pier I and the hosting of the cultural entities (Cinema Festival, Museum of Modern Arts, Museum of Photography etc.) on this Pier gave the opportunity to the City to learn what the port is and convinced the citizens that the port is a part of their history, their culture and their life."

February 2019: Ingvar M. Mathisen (CEO, Port of Oslo)

"Although Oslo and Norway are humble players in a big world, we have one of the world's leading maritime clusters and score particularly well in maritime finance, law and technology. Oslo is also considered to be one of the best in coping with the digital transformation in the maritime sector. Port of Oslo is proud of being part of the city's maritime cluster."

October 2018: Jacques Vandermeiren (CEO, Port of Antwerp)

"As port authority, we have to evolve in the role we assume, in order to be ready for 'Change'. Instead of our historic role as passive landlord, we will become more and more an active facilitator and community builder."

January 2019: Valdo Kalm (CEO, Port of Tallinn)

"We represent the image of Estonia and are one of the engines behind Estonia's economy. Our role is to improve Estonia's competitiveness as a maritime country. Our main challenges are related to boosting our competitive ability in our four fields of business and doing it in a smart and environmentally friendly way."

December 2018: Dan Nicolae Tivilichi (Former Director General, Maritime Ports Administration SA Constanta)

"Constanta has the largest container terminal on the Black Sea, but the latest major achievement is its status as agribulk hub for Central and Eastern Europe. The connection to the Danube river plays a major role in achieving this status. The low cost of transportation and the large quantities that can be shipped on the Danube offer an efficient alternative to the congested European rail and road transport."

November 2018: Aurelio Martínez Estévez (Chairman, Port of Valencia)

"Now, our goal is to consolidate these excellent relationships and develop projects that facilitate and streamline trade between Asian and European companies using modern technological tools and blockchain solutions."

ESPO in Numbers

Almost **8/10 European ports** take climate change into consideration when they develop new infrastructure projects.

Overall **31,76%** of port professionals attending technical Committee meetings were women, **68,24%** men

1 – Air Quality remained the number 1 priority for European Ports in 2018 (a place it has consistently held since annual reporting began in 2016).

59% of ports strengthen the climate resilience of existing infrastructure.

41% of ports have already dealt with operational challenges due to climate change.

47% of ports now experience operational challenges related to climate change (6% increase since 2018).

62% of ports take steps to strengthen the resilience of its existing infrastructure in order to adapt to climate change.

Out of the **71%** of ports with a certified Environmental Management System, **26.9%** opted for EcoPorts' PERS.

29
May 19

European Ports are a Strategic Partner in Building a Sustainable, Competitive and Smart Europe

In view of the European elections, which will lead to a new Commission, a new European Parliament and a new vision for Europe, European ports have prepared a memorandum emphasizing the role port managing bodies can play as facilitators of the port ecosystem.

The ESPO memorandum identifies ten priorities, ten fields of action and importance for the next five years.

The memorandum has been presented during the ESPO annual conference in Livorno, taking place in Livorno, by ESPO's Secretary General, Isabelle Ryckbost: "The memorandum explains how ports can contribute to Europe's competitiveness. It's more than just a shopping list of what Europe needs to do or not for European ports. European ports are the entry gates for trade, are at the crossroads of supply chains and are hotspots of energy, industry, innovation and digitalisation. We believe that European ports are a strategic partner in achieving Europe's goals in terms of digitalisation and decarbonisation."

ESPO Re-elects Eamonn O'Reilly As Chairman

Eamonn O'Reilly was unanimously re-elected as Chairman following a vote of ESPO's General Assembly in Brussels on Wednesday afternoon. E. O'Reilly has been chairing the organisation during the last two years.

The General Assembly also re-elected António Mauad and elected Zeno d'Agostino as Vice-Chair. Mr Mauad is currently Managing Director of the Finnish ports Association and has been Vice Chair since 2014. Mr d'Agostino is President of Assocorti, the Italian Association of Ports and President of the Port Network Authority of the Eastern Atlantic Sea. Z. d'Agostino replaces Bernard Massel (BPF-France) who has been Vice Chair for the last four years.

ESPO entrega certificación EcoPorts a terminales portuarios de España e Irlanda

29 May, 2019

Por Redacción PortalPortuario.cl

@PortalPortuario

European Sea Ports Organisation (ESPO) certificó a tres nuevos terminales portuarios con el estándar de EcoPorts. La entidad indicó que el Puerto de Ceuta, la Compañía Portuaria Shannon Foynes (Irlanda) y el Puerto de Melilla obtuvieron el estándar de gestión ambiental (PERS) de EcoPorts.

Isabelle Ryckbost, secretaria General de ESPO, Eamonn O'Reilly, presidenta de ESPO, y Sotiris Raptis, coordinadora de EcoPorts, entregaron los certificados de PERS a los representantes de los puertos durante la Conferencia anual de ESPO en Livorno.

Al respecto, Ryckbost señaló que "me gustaría felicitar al Puerto de Ceuta por obtener el estándar ambiental de EcoPorts y a la Compañía Portuaria Shannon Foynes y al Puerto de Melilla por renovarlo. Los puertos europeos están claramente interrelacionados sus esfuerzos para comunicarse sobre sus políticas ambientales y para comprometerse con los ciudadanos y la comunidad circundante. El ciudadano de 2019 quiere estar mejor informado y está más comprometido".

Huelva port renews PERS certification

April 24, 2019 | Huelva, Port Operations, Spain

Huelva, Spain (PortSEurope) April 24, 2019 – Autoridad Portuaria de Huelva (APH – Port Authority of Huelva) has renewed its Port Environmental Review System (PERS) environmental certification, the only environmental management standard specific to the port sector, promoted by the European Sea Ports Organisation (ESPO).

Source: Autoridad Portuaria de Huelva | Huelva port has met the requirement to increase transparency in environmental matters through the publication of periodic reports, ESPO said. The president of Huelva port authority, Pilar Miranda, emphasised that "this certification supports the compliance with environmental standards needed in a port like ours that is committed to being a green port, sustainable, integrated and respectful of its environment."

The general secretary of ESPO, Isabelle Ryckbost, has congratulated the port of Huelva for renewing this certification in compliance with the transparency and communication standards, which reinforce its position in the face of environmental challenges such as climate change or improving air quality, among others.

European Ports Welcome Agreement On CEF II

In Port News | 27/03/2019

The European Seaports Organisation (ESPO) welcomes the Common Understanding between the European Parliament and the Council on the future Connecting Europe Facility (CEF II). With its vote on 25 March, the European Parliament's Transport and Industry Committees confirmed the partial agreement, which sets out the EU's funding priorities and modalities in the transport sector for the period 2021-2027. The precise budget, as well as horizontal provisions such as Cohesion funding and the way third countries can participate in the programme will be negotiated under the new Parliament.

ESPO strongly supports the European Parliament's call for an increased transport budget of €335 bn. The budget proposed by the European Commission is insufficient to complete the TEN-T network and to invest in a safe, modern and sustainable transport network. Moreover, ESPO believes the proposed €10 bn transfer from the Cohesion Fund to CEF II should be safeguarded.

"The Parliament has given a strong signal in favour of an increased transport budget for the coming years. We embrace this decision and hope it will be confirmed in the further negotiations. Completing the TEN-T network as foreseen is crucial for the future of Europe. But on

Porti: Espo, investire in scali 'intelligenti' e sostenibili

Zeno D'Agostino, 'L'Africa è una grande opportunità economica'

"Investire in porti efficienti, sostenibili e intelligenti significa investire nell'Europa" Si chiude con questo messaggio l'assemblea internazionale di Espo, l'associazione che riunisce gli enti di amministrazione portuale di 23 Stati europei, che si è svolta ieri e oggi a Livorno. Nella due giorni, ospitata al teatro Goldoni di Livorno e organizzata dalla locale Autorità di sistema insieme con Assoporti, sono stati analizzate le prospettive di sviluppo di questo settore. Tra queste l'autonomia nei trasporti, il ruolo dei porti come catalizzatori su strade, ferrovie, pianificazione urbana e la transizione energetica verso le imbarcazioni nei porti e sulle navi. Nel corso del convegno finale, moderato dal parlamentare europeo Wim van de Camp, il presidente dell'Autorità di sistema portuale di Trieste, Zeno d'Agostino ha ricordato anche l'importanza dell'Africa. "L'Africa è una grande opportunità economica per l'Europa" - ha detto D'Agostino -. Dobbiamo anticipare le politiche cinesi su quel continente".

ESPO: One Third of port Professionals are Women

Photo: ESPO

The European Sea Ports Organisation (ESPO) said that it has been monitoring the gender balance through the effective attendance of port professionals to the different meetings of the organisation over the past year.

"The outcome of this monitoring reveals that, all technical committees together, overall 31,76% of port professionals attending the meetings were women, 68,24% men," announced the industry body.

Looking in more detail into the different committees, the results of this monitoring reveals that the Port Governance committee, the Trade Facilitation, Customs and Security committee, the Sustainable Development committee and the Cruise and Ferry port network are scoring very well with almost an equal representation of men and women at the meetings.

ESPO Secretariat

ESPO's Permanent Secretariat in Brussels ensures the communication between the European institutions and the ports throughout Europe and is responsible for the general management of the organisation.

Isabelle Ryckbost
Secretary General

Anne-Rieke Stuhlmann
Senior Advisor Intermodal & Logistics, Social Dialogue, Statistics, Port Governance

Sotiris Raptis
Senior Advisor Environment and Safety, EcoPorts Coordinator

Turi Fiorito
Senior Advisor

Laurens Schautteet
Policy Advisor Cruise and Ferry Network, Trade Facilitation, Customs and Security

Jacob Armstrong
Trainee Policy Advisor

Cécile Overlaet
Finance and Office Manager

Hélène Vancompernolle
Personal Assistant, Events and Communication Manager

Céline Lefort
Administrative and Event Assistant

Overview of ESPO Membership (2019-11-04)

Country	National Port Body	General Assembly Representative	Executive Committee Representative 2018-2020
Belgium	none	Guy Janssens (Antwerp Port Authority)	Guy Janssens (Port of Antwerp)
		Daan Schalck (North Sea Port)	
		Joachim Coens (Port Authority Zeebrugge)	
Bulgaria	Bulgarian Ports Infrastructure Company	Georgi Todorov (Bulgarian Ports Infrastructure Company)	Angel Zaburtov (Bulgarian Ports Infrastructure Company)
		Angel Zaburtov (Bulgarian Ports Infrastructure Company)	
Croatia	Croatian Ports Association	Milan Blaževski (Port of Split Authority)	Tomislav Batur (Port of Ploce Authority)
		Nina Perko (Ministry of Maritime Affairs, Transport and Infrastructure)	
		Marino Juretic (Port of Rijeka Authority)	
Cyprus	Cyprus Ports Authority (CPA)	Anthimos Christodoulides (CPA)	Michel Christensen (CPA)
		Anthia Klerides (CPA)	
		Petros Krassas (CPA)	
Denmark	Danish Ports	Carsten Aa (Lindø Port of Odense)	Tine Kirk Pedersen (Danish Ports Association)
		Rune Rasmussen (Associated Danish Ports – ADP)	
		Thomas Elm	

		Kampmann (Port of Koge)	
Estonia	none	Ellen Kaasik (Port of Tallinn)	Magnus Vihman (Port of Tallinn)
		Magnus Vihman (Port of Tallinn)	
Finland	Finnish Port Association	Torbjörn Witting (Port of Kokkola)	Annaleena Mäkilä (Finnish Port Association)
		Hannu Asumalahti (Finnish Port Association)	
		Annaleena Mäkilä (Finnish Port Association)	
France	Union des Ports de France (UPF)		Jean-Pierre Chalus (UPF)
		Mériadec Le Mouillour (CCI de Brest)	
		Hervé Martel (Grand Port Maritime de Marseille)	
Germany	none	Bettina Linkogel (Ministry of Economics and Ports, Bremen)	Bernhard Zampolin (Hamburg Port Authority)
		Jens Zingler (Min. f. Verkehr, Bau u. Landesentwicklung Mecklenburg Vorpommern)	
		Bernhard Zampolin (Hamburg Port Authority)	
Greece	Hellenic Ports Association - ELIME	George Kastellanos (ELIME)	Sotiris Theofanis (Port of Thessaloniki)
		Theodora Riga (Piraeus Port Authority SA)	
		Sotiris Theofanis (Port of Thessaloniki)	
		Brendan Keating (Port)	Pat Keating (Irish Ports)

Ireland	Irish Ports Association	of Cork Company) Eamonn O'Reilly (Dublin Port Company) Pat Keating (Shannon Foynes Port Company)	Association)
Italy	Associazione Porti Italiana - Assoporti	Zeno D'Agostino (Assoporti)	Zeno D'Agostino (Assoporti)
		Daniele Rossi (Assoporti)	
		Oliviero Giannotti (Assoporti)	
Latvia	none	Irina Gorbatikova (Freeport of Riga Authority)	Martins Ziemanis (Freeport of Riga Authority)
		Inita Luna (Freeport of Riga Authority)	
		Ansis Zeltins (Freeport of Riga Authority)	
Lithuania	none	Adomas Alekna (Klaipeda State Seaport Authority)	Arturas Drungilas (Klaipeda State Seaport Authority)
Malta	Authority for Transport Malta	David Bugeja (Authority for Transport Malta)	David Bugeja (Authority for Transport Malta)
		Joseph Bugeja (Authority for Transport Malta)	
		Roberto Vassallo (Authority for Transport Malta)	
The Netherlands	none	Koen Overtoom (Port of Amsterdam)	Victor Schoenmakers (Port of Rotterdam)
		Cas König (Groningen Seaports)	
		Ferdinand van den Oever (Havenschap)	

		Moerdijk)	
		Allard S. Castelein (Port of Rotterdam)	
		Jan Lagasse (North Sea Port)	
Norway	Norwegian Ports Association	Arnt-Einar Litsheim (Norwegian Ports Association)	Arnt-Einar Litsheim (Norwegian Ports Association)
		Halvard Aglen (Norwegian Ports Association-Port of Kristiansand)	
		Tore Lundestad (Port of Borg)	
Poland	<i>none</i>	Krzysztof Zalewski (Port of Gdansk)	Aneta Szreder- Piernicka (Port of Szczecin-Swinoujście)
		Adam Meller (Port of Gdynia Authority SA)	
		Krzysztof Urbaś (Port of Szczecin- Swinoujście)	
Portugal	APP - Association Ports of Portugal	Lidia Sequeira (APP)	Lidia Sequeira (APP)
		Ligia Correia (APRAM – Administração dos Portos da Região Autónoma da Madeira, SA)	
		José Luis Cacho (APS – Administração dos Portos de Sines e do Algarve, S.A)	
Romania	<i>none</i>	Daniela Serban (Maritime Ports Administration SA)	Alexandru Madalin Craciun (Maritime Ports Administration SA)
		Marcella Daniella Costea (National Company “Maritime Danube Ports Administration” Galati/APDM)	

		Dumitru Poalelungi (National Company “Maritime Danube Ports Administration” Galati/APDM)	
Slovenia	Luka Koper	Boris Jerman (Luka Koper)	Dimitrij Zadel (Luka Koper)
		Ziga Fiser (Luka Koper)	
		Dimitrij Zadel (Luka Koper)	
Spain	Puertos del Estado	Salvador de la Encina (Puertos del Estado)	Nuria Gaiton Redondo (Puertos del Estado)
		José Luis Hormaechea Escos (Port Authority of Algeciras Bay)	
		Ramón Gomez-Ferrer Boldova (Port Authority of Valencia)	
Sweden	Ports of Sweden	Joakim Ärlund (Ports of Sweden)	Christine Hanefalk (Ports of Sweden)
		Christine Hanefalk (Ports of Sweden)	
		Elvir Dzanic (Port of Göteborg AB)	
United Kingdom	British Ports Association / UK Major Ports Group	Richard Ballantyne (British Ports Association)	Tim Morris and Richard Ballantyne (Alternate)
		Mark Simmonds (British Ports Association)	
		Paul Davey (Hutchison Ports (UK) Ltd / Port of Felixstowe)	
		Tim Morris (UKMPG)	

Observer Members			
Country	National Port Body	General Assembly Representative	
Iceland	Associated Icelandic Ports - AIP	Gisli Gislason (Associated Icelandic Ports – AIP)	
Israel	Israel Ports Company	Dov Frohlinger (Israel Ports- Development and Assets Co., Ltd)	
Ukraine	State Enterprise “Ukrainian Sea Ports Authority”	Raivis Veckagans (State Enterprise “Ukrainian Sea Ports Authority”)	

Market Development in Figures

The statistical section of this Annual Report is based on figures of Eurostat, kindly made available by Mrs. Boryana Milusheva and Mr. Georges Xenellis.

Liquid bulk traffic for selected European ports (1000 tonnes)
